

My family and many of our friends listen to K-Love (105.5) and Air 1 (89.1) daily. They are radio stations that encourage and provide music and commentary that doesn't have to be censored. There are few options for us to listen to that I can say that about. The community would be negatively impacted if these stations were to be displaced by an LPFM broadcaster because K-Love and Air 1 provide an alternative to listening to music and commentary that on other stations can be inappropriate for families.
